

16. Letters of Support

California Family

Health Council, Inc.

December 29, 2008

Daniel Resnic
Strata Various
311 North Robertson Blvd., #318
Beverly Hills, CA 90211

Dear Daniel,

The California Family Health Council (CFHC) would be pleased to conduct the Phase II clinical studies with the "Origami Male CondomTM" as part of your SBIR grant submitted to NIH for consideration. We have developed a strong working relationship with Strata Various throughout the successful execution of the SBIR Phase I Study of the "Origami Male CondomTM", and look forward to our continued collaboration on the Phase II Clinical Studies.

The "Origami Male CondomTM" performed very well in the Phase I trial with no clinical breaks and only one slip off among approximately 100 uses. In addition, one-third of participants preferred the Origami Male Condom to the "TrojanEnzTM" latex control condom, a best selling commercial condom. CFHC believes that the "Origami Male CondomTM" has proven readiness for advancing to a Phase II evaluation.

We are confident that CFHC can provide the necessary scientific expertise, facilities and client population base to carry out the proposed Phase II Clinical studies of the "Origami Male CondomTM". The CFHC Research Division has 30 years of experience in the design, execution, administration and analysis of Phase II, III and IV clinical investigations with a variety of new methods of contraception. Our research team offers an extensive background of research and clinical experience in the areas of contraceptive research, family planning, epidemiology, data management.

Additionally, CFHC will be pleased to consider participation in your condom launch pilot program following FDA approval. As you know, we distribute condoms through our client services programs. We look forward to discussing this in further detail.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Ron G. Frezieres', is written over a horizontal line.

Ron G. Frezieres, MSPH
